

## Things you can do with the community

**Video 1** and the following **For Reflection Activities** can be used in staff meetings or individually to reflect on how you and your centre support and develop cultural competence in infant / toddler programs.

*"I would go on websites to find resources for educators or families"*

(Narelle Shanahan)

➤ **What websites can you find that assist you to:**

- Obtain resources for yourself, other educators or parents such as tip sheets or parent information sheets interpreted into a particular language?
- Identify cultural groups /organisations in your community that you could contact to ask for guidance, resources, incursions and excursions?
- Find songs from different cultures?
- Access books, resources and equipment from different cultures that you can buy new or second hand, or borrow?  
*E.g. Join FKA Children's services resource library that includes a postal service in their membership.*
- Access resources for families who have expressed and/or demonstrated that additional supports may be of benefit.

➤ **What events such as festivals in your local community can you participate in to build relationships and increase understanding and enjoyment of cultures in addition to your own?**
